

Confirm you do not have an old **AirPennNet** profile installed on your laptop. You will need to delete it if installed.

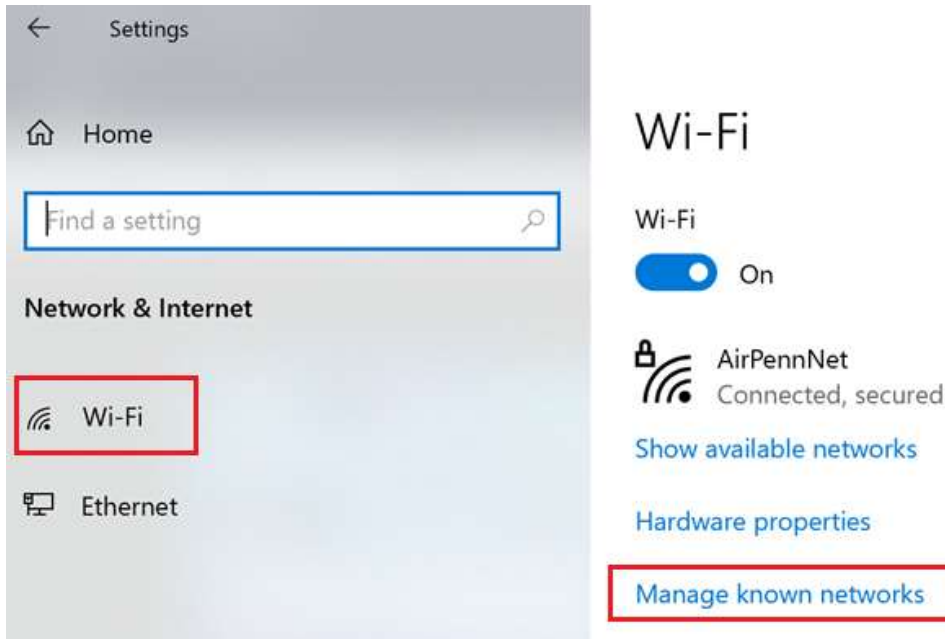

To confirm, open **Settings** from the **Start Menu**, or by pressing the **Windows key + i**

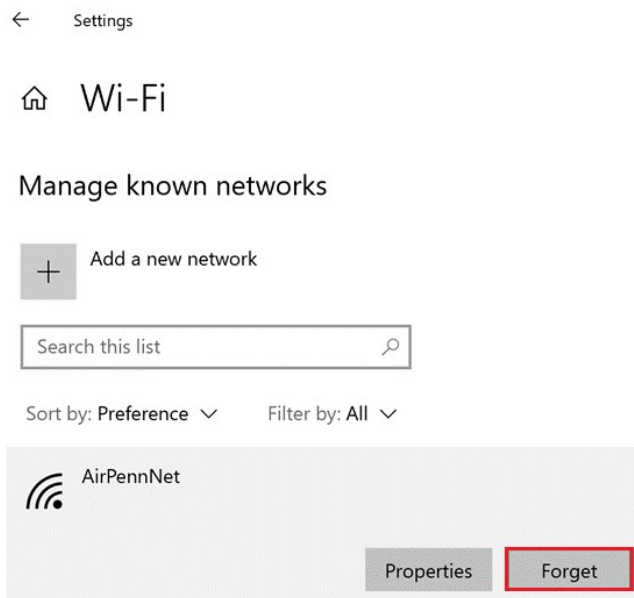

Select **Network and Internet**

Select **Wifi** in the left pane and **Manage Known Networks** in the right pane.

Click on the **AirPennNet** entry and click **Forget**

You can now connect to AirPennNet. When prompted for credentials, enter your ***Pennkey and Pennkey Password.***
